ABSTRACT:

Use in a cosmetic composition to be applied to the skin or mucous or semi-mucous parts, of a polymeric system consisting of an aqueous dispersion of particles of a film-forming polymer which gives a film having a hardness of less than about 110.

ABSTRACTED-PUB-NO: EP 793957A
BASIC-ABSTRACT:

Use in a cosmetic composition to be applied to the skin or mucous or semi-mucous parts, of a polymeric system consisting of an aqueous dispersion of particles of a film-forming polymer which gives a film having a hardness of less than about 110.

USE - The composition is useful in make-up compositions for the lips (e.g. lipsticks, as well as foundation cream, eye shadow and eye-liner) and in the protection and treatment of the skin (e.g. in dermatological, solar and pharmaceutical compositions) (all claimed).

ADVANTAGE - The resulting supple, shiny and elastic film has good holding power, does not transfer to other surfaces, does not migrate over time or stain and follows the skin's movement, so that it does not crack during use or become unstuck (all claimed).

ABSTRACTED-PUB-NO:

EP 793957B
EQUIVALENT-ABSTRACTS:

Use in a cosmetic composition to be applied to the skin or mucous or semi-mucous parts, of a polymeric system consisting of an aqueous dispersion of particles of a film-forming polymer which gives a film having a hardness of less than about 110.

USE - The composition is useful in make-up compositions for the lips (e.g. lipsticks, as well as foundation cream, eye shadow and eye-liner) and in the protection and treatment of the skin (e.g. in dermatological, solar and pharmaceutical compositions) (all claimed).

ADVANTAGE - The resulting supple, shiny and elastic film has good holding power, does not transfer to other surfaces, does not migrate over time or stain and follows the skin's movement, so that it does not crack during use or become unstuck (all claimed).
